## SEE IN ACTION

Machinery for working the soil, for seeding, for fertilizing, for irrigation, for crop protection and haymaking.

### 13/14/15 JULY 2018

timetable: 9 am/6 pm

Sunday 9 am/1 pm

DEMONSTRATION  
DAYS

EIMA Show Umbria is the demonstration event of machinery and equipment for precision farming. The 2018 edition includes three days of trials in the field of tractors, combine harvesters, operating machines and equipment managed with cutting-edge satellite, computer and electronic tools. A wide range of specific components and new-generation operating supports, such as specialized agricultural drones, completes the range of technologies on show and offers a concrete experience of what today can be called Agriculture 4.0. At EIMA Show Umbria, the most advanced electronics are applied to agricultural mechanical vehicles to guarantee greater productivity, better use of resources, safety for operators and respect for the environment.

### 2017: THE NUMBERS

**Over 90 models of tractors and combine harvesters of the latest generation •  
More than 200 implements for forage harvesting, tillage and other crop operations • 50 manufacturers • 15 thousand visitors**
